

REMARKS

After the foregoing Amendment, claims 1-6 are pending in the application.

Claims 1-4 have been amended to place them in better U.S. form and to correct an error in the claims identified by the Applicants. Since all of the foregoing claim amendments are merely for clarity, such amendments are not for purposes of patentability under Title 35. Additionally, Applicants have replaced the original Specification with a Substitute Specification, filed under 37 C.F.R. § 1.125(b) and (c), including a Clean Version and a Marked-Up Version showing all the changes relative to the immediate prior version of the Specification of record. The added subject matter is shown by underlining the added text, and the deleted subject matter is shown by strike-through. The Substitute Specification differs from the immediate prior version of the Specification of record in that grammatical and typographical errors identified by the Applicants have corrected. Also, several paragraphs have been amended to more clearly describe the invention of the present application. No new matter has been added in the Substitution Specification. Lastly, the Abstract has been amended to better clarify, identify, and describe the subject matter of the application. Accordingly, no new matter has been added to the application.

CONCLUSION

In view of the foregoing Amendment and Remarks, Applicants respectfully submit that the present application, including claims 1-6, as amended, is in condition for allowance and such action is respectfully requested.

Respectfully submitted,

TAKAHIRO KAJIHARA *et al.*
